

## Supports vegetable crops to safeguard your productivity

### INORGANIC FOLIAR FERTILISER LIQUID

#### 👍 WHY USE IT

- Keep the plant within the optimal pH-RedOx balance
- Achieve marketable yield targets
- Extend the shelf life of fruits and vegetables

#### + PRODUCT BENEFITS

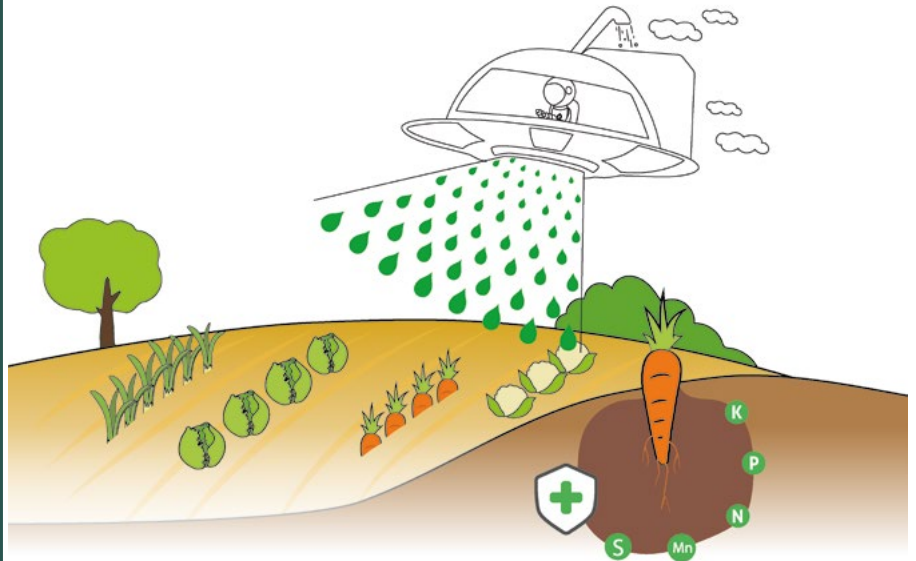

- **Compatible** with herbicides and fungicides
- **No additional spraying** required
- **Ready to use**

#### PACKAGING

# VEGSMART

- ✓ Supplies sulfur and manganese, essential components for proper photosynthetic activity
- ✓ Provides antioxidants to keep the plant within a healthy pH-RedOx balance
- ✓ Safeguards yield
- ✓ Improves the storage life of vegetables

### TECHNICAL SPECIFICATIONS

#### Instructions for use:

Product suitable for the following vegetable crops: strawberries, lettuce, carrots, shallots, onions, green peas, melons, cucurbits, potatoes, green beans, head cabbage, cauliflower, broccoli, tomatoes, spinach, leeks.

Dosage and application period
2 L/ha For frequency and application timing, please contact VERTICAL

#### Composition:

- Molasses base
- Plant extracts (including nettle and horsetail)
- Floral elixirs

Density: 1.1  
pH: 3.6

Carrier: Manganese sulfate

#### Recommandations:

Shake well before use.

Spray when humidity is above 60%, preferably early in the morning or late in the day, using the lowest possible pressure.

The spray water must be of good chemical and physical quality: soft water (< 15°F) with a RedOx potential below 300 mV. Do not spray with water that is too cold (< 10°C).
